**Attachments:** IMG\_6373.jpg

Apply just confirmed that Fortcraft is *not* proceeding on the App Store!

Thanks,

Canon Pence

I don't think Netease pulled it from TestFlight as they are shipping updates:

Δ DEFENDANT Δ	United States District Court Northern District of California

It is pulled from TestFlight (either by Apple or them) - it no longer shows up as an app you have access to in TestFlight. Doesn't impact you if you already have it installed but it means no updates.

Can you see what you can find out from Shaan? I suspect it's based on Test Flight. I did suggest that path to her

The Fortcraft web site says:

"Dear Explorer, the quota of iOS application is full already. We are sorry that currently there are no vacancies for iOS beta testing with TestFlight. But you can still download FortCraft in Google Play Store. Thanks for your support and stay tuned for more updates!"  
I don't know if Apple took action of it they exceeded the 10,000 user limit for Test flight. It would be great to find out.

Excellent!

Do we know any details?
