Subject: Mobile payment strategies

United States District Court
Northern District of California

Case No. 4:20-cv-05640-YGR
Case Title Epic Games, Inc. v. Apple, Inc.
Exhibit No. DX-4333
Date Entered

Susan Y. Soong, Clerk
By: , Deputy Clerk

Hey all,

At Tim's request, we are forming a special project team to produce details for mobile payment strategies and related options. The specific asks are

- 1) How long on Android and iOS would it take to implement Epic payment processing side by side with platform payments?
- 2) What are the implications of offering different value to the mobile payment choice (eg, Apple/Google payment would be set to 18% higher price than using Epic mobile payment processing and console/PC)?
- 3) During this timeframe, can we make the Samsung Pay UX nice?
- 4) What should be the priority order of new payment options (e,g carrier billing, Samsung Pay on Android, etc.)
- 5) What other mobile payment strategies or tactics should be considered?

Our goal is to present at least a first draft of responses by next Thursday (mtg to be scheduled). To expedite, I propose assigning leads to each question (they can ask for team member assistance as needed).and we'll have a kickoff meeting on Tuesday. I've created a shared deck for people to use and ideally by Monday COB everyone can have contributed or reviewed the deck.

Ask Leads (slides assigned in the shared deck)

- 1. Dave Nikdel
- 2. Nate Adams, Dave Nikdel
- 3. Phil Buuck
- 4. Thomas Ko/Hans Stolfus
- 5. Thomas Ko

Team members (areas)

Dave N (payment tech), Philip B (UI), Thomas K (strategy, payment svcs and Samsung), Frank L (ecomm), Hans S (Google, platform mkt, and partnerships in general), Kayla P (legal), Haseeb M (Apple, consumer mkt), Nate A (rev/economy implications). Optional invitees to the meetings are Chris B (client tech), Joe K and David S (1st party console).

I've also created a private slack channel at mobile-payment-strat-planning.

Thanks,

Ed
